Forecast for Friday 11 Nov 2022

Weather: Rain will continue to affect Skye, Torridon and hills towards Ullapool during the day where the ground will be very saturated with all rivers and streams likely to be in spate. A few brighter and drier spells possible around Caithness hills and towards Easter Ross. During the afternoon rain will finally clear south and it will brighten from the north, however mist and fog patches are likely moving towards the evening.

Chance of cloud-free hill tops above 800m: 20% low cloud in association with frontal rain affecting the western ranges. Improving to 70% later in the day.

Low cloud and visibility: In the west cloud layers will form above 200m and will be extensive with near zero visibility on the higher ground. Below cloud visibility will also be moderate or poor in rain at times. The best conditions will be found in the east for hills towards Easter Ross and Caithness even here patches of lower cloud will affect the ranges above 600m at times and although visibility will be generally good it may fall moderate for a time in the afternoon. Conditions improving later in the day with low cloud layers lifting and breaking.

Freezing Level*	3100m	3300m	3100m	2500m	1700m	1700m	1600m

**Level above which ground is expected to be frozen/snow is expected to settle.*

Met Office Aberdeen Meteorologist's View

Despite the severe gales it will be quite mild, especially around Caithness and Easter Ross. Winds will be storm force at times and combined with heavy rain, conditions will be treacherous. Flooding is expected and burns and water courses are likely to be bankful with the rainfall amounts in the west.

Forecast for Saturday 12 Nov 2022

Weather: Clear spells overnight and a bright start to the day on Saturday but increasing cloud from the south and some mist and drizzle will spread north during the morning with outbreaks of rain for western ranges in the afternoon. Becoming breezy again during the afternoon.

Maximum wind: Southerly 10-15mph, becoming 20 gusts 30mph.

Chance of cloud-free hill tops above 800m: 90% falling to 20% later in the day as rain and drizzle spreads north. Improving to 60% again later in the day

Low cloud and visibility: Patches of cloud around higher summits in the morning but cloud will thicken and lower as rain spreads north becoming broken above 4-500m, northern areas will see the best conditions with some shelter until the afternoon. Cloud will lift and thin later in the afternoon but areas remaining for western ranges. Visibility will be good in the morning but turn poor in light rain and drizzle, improving once again later in the day.

Temperature: **Glens:** Plus 7 rising to 13 Celsius.
At 800m: Plus 3 rising to 7 Celsius.
Freezing level: Above all summits.
